Visual Representations Planning

Create a list of all the visuals you will need for your simulation. Remember that every pose or movement of an object is an individual image or drawing that needs to be created and animated. You can use this table to mark if the visual asset needs to be created or if it has been found or completed. Add rows as needed.

| Visual Representation | Needs to be Created | Found or Completed |
|-----------------------|---------------------|--------------------|
| | | |
